#### **Financial Activity**

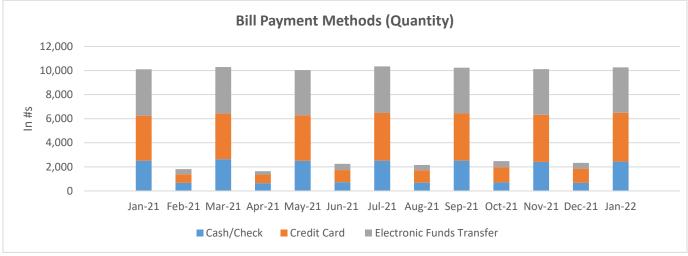

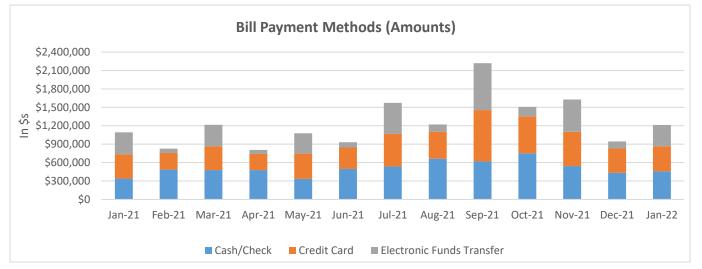

1) Water revenue is up due to heat waves in June & Aug. causing greater water use for the summer billing cycles. 2) SDC Revenue is also much higher primarily due to receiving more than normal applications prior to the increased rates effective July 10, and other SDC payments at the new rate approved by the Board in June 2021. 3) There are no costs for CIP Bond as that fund was closed out in FY 2021 but will be reported in the 5-year graph until 2026. 4) Personnel Services expenses were high in FY 2020 due to the payment of the PERS transitional liability

(as of the end of January 2022)

#### Sampling Reports

#### Regulatory

All 73 samples collected and analyzed for the January monitoring period showed no presence of coliform/E. coli bacteria.

Quarterly Disinfection By-Product sampling was conducted at 4 locations in the North Service Area and 4 locations in the South Service Area distribution systems.

Annual Point of Entry Sampling was conducted in the North and South Service Areas for inorganic compounds, including metals, synthetic inorganic chemicals (SIOCs, 29 regulated for drinking water, 5 unregulated), volatile organic compounds, (VOCs, 21 regulated, 36 unregulated) and synthetic organic chemicals (SOCs, 29 regulated, 14 unregulated).

#### **Non-Regulatory**

General water quality parameters (pH, temperature, chlorine, TDS, hardness, alkalinity) were collected throughout the distribution system at 19 locations in the North and South systems.

Monthly watershed sampling was conducted at 4 long-term sampling locations for total organic carbon, VOCs (Volatile Organic Chemicals), nutrients (nitrate/nitrite, total phosphorus, orthophosphate, etc), coliform density, pH, dissolved oxygen, TDS, and temperature.

Quarterly watershed sampling was conducted at our intakes for inorganic compounds, including metals, synthetic inorganic chemicals (SIOCs, 29 regulated for drinking water, 5 unregulated), volatile organic compounds, (VOCs, 21 regulated, 36 unregulated) and synthetic organic chemicals (SOCs, 29 regulated, 14 unregulated).

Raw water at our intakes was tested for giardia and cryptosporidium.

• As of January 1st, **the Willamette basin snowpack was 124% of median.** This is lower than last month when the Willamette basin snowpack was 148% of median.

• Precipitation since the beginning of the water year (October 1 - February 1) has been 102% of median.

• The April through September streamflow forecasts in the Clackamas River at Estacada is 118% of average.

• The three-month outlook from the NOAA Climate Prediction Center calls for elevated chances of above normal temperatures for much of Oregon, and only slightly elevated chances of above normal precipitation for northern Oregon.
